Corrosion Protection work has a broad profile of technology & services to protect and monitor of different type steel structure from the effect of corrosion in various parts of India.

We provide best in class

[i] Surface treatment work. (Sand/Grid/Short/Copper Slag/quartz blasting)

[ii] Metal coating work. (Aluminum/Zinc/Mild Steel)

[iii] Painting work. (Airless/Epoxy).

As guided by relevant IS, IRS& ISO technical specification.

These solutions enhance the safety, environmental integrity, reliability & compliance of our's Client's.

We work closely with clients to develop a cost effective solution to their requirements. Our project team is proactive with their day to day project activities & enjoys close working relationship with Clients.
